PROFESSIONAL SERVICES  
CIPP Rehabilitation of the Upper Saw Mill Run and Lower Ohio Interceptors  
S-491**

**ADDENDUM NO. # 1**

**DRAWINGS/FORMS**

1. none

The following Questions have been submitted.

1. Please confirm how ALCOSAN intends to handle the bidding/award/closeout process?  
Will it be completed by ALCOSAN staff?
  - a. *ALCOSAN will be responsible for the bid/award process with the consultant assisting developing the scope of work/design. The CM as well as ALCOSAN will closeout the project. The Contractor will be expected to provide redlines. No record drawings will be required.*
2. Does ALCOSAN intend to provide inspection services during construction or should we be including resident project representation in our qualifications package?
  - a. *The design consultant shall provide services during construction; however, a construction manager will be providing resident inspection services during construction.*
3. Is the project intended to be Design Bid or is ALCOSAN looking for an engineer to team with a contractor to perform a Design-Build?
  - a. *This is a Design-Bid-Build.*
4. Has ALCOSAN already CCTV'd the sewers in question and believes that CIPP lining is the way to move forward for all of them? Or will the consultant be responsible for having the sewers CCTV'd and perform an evaluation to determine which sewers should be CIPP lined and which segments would require a different repair method and subsequently provide the design of the CIP and other repair methods?
  - a. *ALCOSAN has recently CCTV'd the sewers proposed for lining.*
5. Can you please include clarification on whether or not ALCOSAN would be open to an alternative rehab technique in the addendum?
  - a. *CIPP is the preferred method of rehabilitation for circular pipe.*
