## **ALCOSAN Awards Over \$7.5 Million in GROW Cycle 11 Grants to Support Regional Sewer Infrastructure Projects**

**Pittsburgh, PA** — The Allegheny County Sanitary Authority (ALCOSAN) is pleased to announce the recipients of Grow Cycle 11 funding, awarding more than \$7.5 million in grants to support critical sewer separation and sanitary sewer rehabilitation projects across Allegheny County.

The GROW Program, a pillar of ALCOSAN's Clean Water Plan, funds projects that reduce the volume of stormwater and groundwater entering the sewer system, helping to prevent overflows and protect the region's waterways. Under the program, any municipality or municipal sewer authority within the ALCOSAN service area is eligible to submit a source control project for grant funding consideration.

In close collaboration with our municipalities, to date GROW has awarded over \$83.2 million in grant funding for source control projects such as green infrastructure, infiltration and inflow, sewer separation and direct stream inflow removal. The completed GROW projects are estimated to have removed over 1.1 billion gallons of water per year from the system and reduced overflow by over 200 million gallons per year.

The following municipalities and authorities have been awarded grants in Cycle 11:

### **Key:**

**SS – Sewer Separation**  
**I/I – Infiltration and Inflow**

#### **McKees Rocks Borough**

- Sewer Separation (SS) - Storm Sewer Separation Project (Phase I). New separate stormwater system to remove stormwater and surface water runoff from the combined sewer system on Bruce Street, Chartiers Avenue, and Margaret Street. \$1,756,200.00

#### **Braddock Borough**

- Sewer Separation (SS) - Storm Sewer Separation Project (M-54). New separate stormwater system to remove stormwater and surface water runoff from the combined sewer system along 5<sup>th</sup> Street. \$89,900.00
- Sewer Separation (SS) - Storm Sewer Separation Project (M-55). New separate stormwater system to remove stormwater and surface water runoff from the combined sewer system along 6<sup>th</sup> Street. \$674,383.47
- Sewer Separation (SS) - Storm Sewer Separation Project (M-56). New separate stormwater system to remove stormwater and surface water runoff from the combined sewer system along 7<sup>th</sup> Street. \$529,152.34
- Sewer Separation (SS) - Storm Sewer Separation Project (M-57). New separate stormwater system to remove stormwater and surface water runoff from the combined sewer system along 8<sup>th</sup> Street. \$193,952.28
- Sewer Separation (SS) - Storm Sewer Separation Project (M-58). New separate stormwater system to remove stormwater and surface water runoff from the combined sewer system along 9<sup>th</sup> Street. \$485,384.42

#### Crafton Borough

- Sewer Separation (SS) – West Steuben and Richmond Street Sewer Separation Projects. New separate stormwater system to remove stormwater and surface water runoff from the combined sewer system along West Steuben Street. \$2,269,800.00

#### Girty's Run Joint Sewer Authority

- Sanitary Sewer Lining (I/I) - Wible Run and Anderson Road Sanitary Sewer Rehabilitations. Sanitary sewer lining and rehabilitation of over 5,700 feet of sanitary sewers along Wible Run Road and Anderson Road. \$156,000.00

#### Mt. Lebanon

- Sanitary Sewer Lining (I/I) - Painters Run: C5300-MB-L-05 Sewer Rehabilitation. Sanitary sewer lining of over 18,000 feet in an extensive area in Mt. Lebanon Township, including along Connor Road, Washington Road, and Cochran Road. \$579,900.00

#### O'Hara Township

- Sanitary Sewer Lining (I/I) - A-72 Sanitary Sewer Lining Repairs Project. Sanitary sewer lining of nearly 2,400 feet along Parkview Boulevard, Linwood Drive, and Spring Grove Road. \$145,010.00

#### Ross Township

- Sanitary Sewer Lining (I/I) - Longmount Drive Lining Project. Sanitary sewer lining of nearly 2,500 feet along Longmount Drive, Upper Drive, and Oak Drive. \$36,200.00

#### Turtle Creek Borough

- Sewer Separation (SS) - Storm Sewer Separation Project (T-11). New separate stormwater system to remove stormwater and surface water runoff from the combined sewer system along Monroeville Avenue and Penn Avenue. \$113,900.00
- Sewer Separation (SS) - Storm Sewer Separation Project (T-13). New separate stormwater system to remove stormwater and surface water runoff from the combined sewer system along Airbrake Avenue and 9<sup>th</sup> Street. \$491,200.00

Wilkins Township

- Sanitary Sewer Lining (I/I) - TR-04 Sanitary Sewer Lining Repair Project. Sanitary sewer lining repairs of over 1,900 feet along Harrison Road and Linhart Street. \$50,300.00

###

*The Allegheny County Sanitary Authority (ALCOSAN) is a regional wastewater treatment authority that serves approximately 83 municipalities in the Pittsburgh area, including the City of Pittsburgh. Established in 1946, ALCOSAN is committed to protecting public health and the environment by providing essential wastewater services. The Authority operates a state-of-the-art wastewater treatment plant, processes millions of gallons of wastewater each day, and works to ensure that the region's water systems are sustainable for future generations. For more information, visit [www.alcosan.org](http://www.alcosan.org).*
