We would like to thank those who came out last night for the first in our series of public meetings regarding the draft Wet Weather Plan. It is important that you stay informed on the issue of sewer overflows and that your voice is heard before the Plan is submitted to regulators in January. We hope that you will remain an active participant in the process by attending future meetings, submitting your comments for the public record, and encouraging your friends, family and neighbors to do the same.

Our next public meeting is at the West View Fire Banquet Hall on Thursday, August 30 from 9:30 a.m. to noon.
